Jamie,

I will check into it. You should have got this last week.

Hi Francis,

I was just following up on the updated narrative for the FP results. Have you had a chance to correct it and send it to us yet?

Thanks!

Jamie

Jamie,

The field sample numbers will be corrected for 1705004-09 and 1705004-10 as follows;

1705004-09 (Field Sample Name SFS10)

1705004-10 (Field Sample Name SFS10-Dup)

OCS-09 (Lab number 1705002-09) and OCS-10 (Lab number 1705002-10) were analyzed as correctly stated below.

Hi Sylvia and Francis,

Brenda noticed another issue in the narrative. The narrative states that OCS-9 and OCS-10 were not analyzed because they were solids. However, results were reported for these two samples. Also it looks like the wrong lab-designated numbers were associated with these samples. The numbers should be 1705002-09 and 1705002-10 instead of 1705004-09 and 1705004-10, respectively. Since these samples were actually analyzed, they should be deleted from the narrative.

We will need the narrative to be corrected.

Thank you both so much for your help with this!

Jamie

Sylvia,

The field sample name in the narrative corresponding to laboratory sample number 1705002-05 was changed in the narrative to OCS-05. All other information in this report remains the same.

The field sample name in the narrative corresponding to laboratory sample number 1705002-05 should have been OCS-05 and not OCS-02. The narrative is being corrected to reflect this discrepancy.

Hi Angela,

It also appears that sample OCS-05 is missing from FP prelim data that you sent too. We just wanted to check on that sample too.

Thanks!

Jamie

Hi Angela,

On the prelim FP results for Cornell Street, Sample 3 (CS-03) and Sample 7 (CS-07) results were missing from the results. We were just checking on to see if that was an entry error.

Thank you so much for your help!
